

Edge XP™ Active Disk

Edge XP™ Active Disk is a self contained application which runs directly from a portable storage device. Launch Edge XP™ automatically by inserting a Zip® disk, Iomega Mini USB, Iomega® HDD External Hard Drives or CyberKey. A simple, one-time only installation of the Active Disk driver is all that is needed to run Edge XP™. When finished, simply eject, and everything is saved to your secure Zip disk. Portable, easy, and secure – and it won't clutter your hard drive.

About Edge XP™ Active Disk

Edge XP™ Active Disk the first truly mobile document management system, features a single screen GUI to provide a simple to use display, which does not require extensive training. New wireless and mobile technology has brought about a need for a robust product like Edge XP™ Active Disk to manage files and records which are easy to understand yet complex enough to meet the most stringent and growing demands for records availability portability and accountability. Edge XP™ Active Disk was designed to be flexible, open, and easily customizable to handle the demands of:

- Law Firms
- Courts
- Health Departments

About Iomega® Active Disk™

Active Disk Powered software applications require a Zip, HDD, Iomega Mini, or CyberKey storage device connected to any PC. The Active Disk drivers must be installed on each system that you wish to run Active Disk Powered software applications. This one-time installation will allow you to run all Active Disk Powered software applications. The Active Disk drivers are installed with IomegaWare or can be installed by running the SETUP.EXE program from most Active Disk Powered software applications. A Zip, Jaz, or Peerless disk containing an Active Disk Powered software application. Iomega's Active Disk Powered site contains a collection of Active Disk Powered software applications that can be freely downloaded.
